## Assignment 1

**Upload a file**

Next

WEEK 11: TYPES OF QUALITATIVE RESEARCH; 1. DISCUSSED.

## ASSIGNMENT 2:

question is at the last few slides of the ppt file.

the more critical your answers the better.

## COMMENTS ON YOUR ASSIGNMENT 1:

1. Good to see that **only one** of you is able to write more without paragraphs?
2. We learn management but forgot to practice (supposed to plan what we want to write? (and check?). I am not sure whether you all of you seem to have forgotten about this part of assignment preparation? Because your work followed, as they are unstructured and difficult you want to deliver?
3. Please remember that what ever you write (page) there must be always a clear objective at the end did you achieve what you started with? have no objective and conclusion?

have no objective and conclusion?

4. Difficult to make a conclusion if your objective stated? If you want to write a Table of Contents it properly. Definitely the following is: a waste of time?

1. **Case Study**.....  
.....1

2. **Participatory**.....  
.....3

**References**.....**would have been not shown at all??**

5. **This is proper:**

1. TABLE OF CONTENTS:

2. 2, Case Study.  
3

3. 1.1 Introduction.  
3

1.2 Defining case, case study, and cas research. 3

1.3 Types of case study.  
4

1.3.1 Historical case study.

4

1.3.2 Problem-oriented case study.

4

1.3.3 Key component of case study.

4

1.4 Conclusion.

4

If the space given is 2 or 3 page long then plan in the spaces and not write first and at the end know/what/how to conclude? [**SAMPLE SHOW** these layout I can see that he had planned and to put into the 2-page space? I did not even read assignments as the Table of Contents have give indicator of his text? **WITH THE 7 SUBTOPICS Y NEEDED 5-7 LINES FOR EACH AND "CUT AND DIFFICULT TO FILL THE SPACE THUS HE HAD T IN HIS OWN WORDS!]. MANY PROVED THAT T GOOD AT "CUT AND PASTE" THUS MAKING T SENTENCE FLOW DISJOINTED!**

Very important component is: did you achieve

Very important component is: did you achieve objective?

**EXPECTING AN OPENING /INTRODUCTORY PARAGRAPH TO BE LIKE THIS!**

"This paper would like to discuss about understanding ethnography and case study, and the examples they are applied in qualitative research. Hence, explain on a fuller understanding about them is below! [**GOOD INTRODUCTORY PARAGRAPH**]

## 1. ETHNOGRAPHY

According to ..... [**found only ONE ASSIGNMENT SIMILAR TO THIS? BUT UNFORTUNATELY HER OTHER ASSIGNMENTS HAD TOO MANY ENGLISH ERRORS. SHE THEREFORE DID NOT RECEIVE THE GOOD MARKS SHE ORIGINALLY INTENDED.**]

THERE ARE others and will be discussed in class

WEEK 13: [**ASSIGNMENT 4**]:

**Select 1 qualitative research article from a journal and in not more than 3 pages, discuss the methodology used and comment on its appropriateness to the objective of the paper**

**Apply as suggested by slides 8-12 and give your verdict as to the value of the qualitative research paper selected**

### 16\_GOOD\_SAMPLE\_ANSWER\_Assign\_2.docx

#### Objective

The objective of this paper is to facilitate **? MISSING VERB?** the qualitative methods to an 18-year student to make it simple to be understood and appreciated.

#### Introduction

The importance of qualitative research lies in its ability to analyze phenomena in their real context, and the real world context is not often fixed or measurable. Quantitative research, which depends on numbers and statistics (Merriam), therefore will briefly introduce here qualitative search methods by identifying and contexts that can be used.

#### Example

If we ask 10 students, like you, "why do you join this particular specialization?" we have different reasons for all 10 students, some of the reasons may be repeated, some may be new, thus, in the qualitative research, if we want to understand the real phenomenon, we should get answers until we reach "saturation", where no new answers are given. This is why the qualitative might be much more difficult and important than quantitative research. And this paper will cover the main Qualitative
